In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Vertical Multistage Centrifugal Pump market for 2018-2023.

Vertical centrifugal pumps are also referred to as cantilever pumps. They utilize a unique shaft and bearing support configuration that allows the volute to hang in the pump while the bearings are outside the pump. This style of pump uses no stuffing box to seal the shaft but instead utilizes a "throttle bushing

". A common application for this style of pump is in a parts washer. A centrifugal pump containing two or more impellers is called a multistage centrifugal pump. The impellers may be mounted on the same shaft or on different shafts.

Globally, the vertical multistage centrifugal pump industry market is low concentrated as the manufacturing technology of vertical multistage centrifugal pump is relatively matures than some high-tech equipment. And some enterprises, like Grundfos, Ebara, KSB, WILO and Xylem, etc. are well-known for the wonderful performance of their vertical multistage centrifugal pump and related services. Europe, North America and China are the major consumption regions and their market share is 24.42%, 21.54% and 27.62%.

The consumption volume of vertical multistage centrifugal pump is related to downstream industries and global economy. As there will always be some uncertain in the global economy in the following years, the growth rate of vertical multistage centrifugal pump industry may not keep that fast. But it is surely forecasted that the market of vertical multistage centrifugal pump is still promising.

Over the next five years, LPI(LP Information) projects that Vertical Multistage Centrifugal Pump will register a 3.9% CAGR in terms of revenue, reach US\$ 4670 million by 2023, from US\$ 3710 million in 2017.
