In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Vinblastinesulphate (CAS 143-67-9) market for 2018-2023.

Vinblastinesulphate is a white or light yellow amorphous powder, which is easily soluble in water. Vinblastine belongs to the group of cancer-fighting medications known as antineoplastics. Vinblastine is used alone or in combination with other antineoplastic medications to treat many different types of cancer including Hodgkin's disease, non-Hodgkin's lymphoma (cancer of the lymph cells), Kaposi's sarcoma, breast cancer, and testicular cancer. It kills cancer cells by interfering with the genetic material DNA, which is necessary for their growth and reproduction.

Periwinkle Plantation is mainly concentrated in China. The production volume was high during 2000s, with a kilo of Vinca alkaloids can be sold at 10 USD/gram. Now as the less plantation in Hainan Province, the cost of Periwinkle and Vinca alkaloids has hiked at 20 USD/ gram. Currently there are less companies produce Vinca alkaloids, since many companies couldn't survive after capital chain breaks. Globally, leading suppliers are Guangzhou Hanfang Pharmaceutical, Hainan Vinca Biological Medicine Technology and Guangzhou Person Pharmaceutical which are located in China. The three companies produced nearly 60% of global Vinblastinesulphate Vinkem from India also produce Vinblastinesulphate API for cancer treatment drugs.

Over the next five years, LPI(LP Information) projects that Vinblastinesulphate (CAS 143-67-9) will register a 1.6% CAGR in terms of revenue, reach US\$ 21 million by 2023, from US\$ 19 million in 2017.
