Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Vinyl Ester Resins market for 2018-2023.

Vinyl Ester Resins, also known as VER, is a resin produced by the esterification of an epoxy resin with an unsaturated monocarboxylic acid. The reaction product is then dissolved in a reactive solvent, such as styrene, to a 35–45 percent content by weight. The upstream of Vinyl Ester Resins industry is Bisphenol A, epoxy resin, methacrylic acid, maleic anhydride, styrene and so on. Since raw material are most commodities, and most manufacturers can achieve part of the internal supply of raw materials, although raw material ratio in the manufacturing cost is relatively high, in general, bargaining power of raw material enterprises is weak. Vinyl Ester Resins industry downstream industry is wide, the mainly fields are fiber reinforce plastic (FRP), button and coating. FRP Products is the largest application of Vinyl Ester Resins with market share of 56.42% in 2016.

Over the next five years, LPI(LP Information) projects that Vinyl Ester Resins will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
