China gas boilers adopt natural gas or liquefied petroleum gas (LPG) as source of fuel. It is used for house heating as well as hot water.

Working principle: well connect the heating backwater outlet, heating hot water outlet, cold water inlet, clean hot water outlet and gas inlet, then plug in the power supply and turn on the gas supply valve. Turn on the water supply valve to make the heating tube with water, and turn off it when pressure reaches 0.2MPa. Press 'ON" button on the control panel. Control system will inspect whether the pressure of heating system is between 0.1 MPa~0.3MPa. If it performs well, residential wall hung boiler is on standby. After the development of many years, gas boiler has become the third largest gas products in China after gas water heater and gas stove products. By the end of September 2011, there are 85 manufacturers which own gas water boiler production license, of which 22 manufacturers are increased in 2011 (14 of them are Guangdong Enterprises), wall mounted gas boiler brands have reached more than 500.

The brands of wall mounted gas boiler can be divided into German brands, European brands (except German brands) and domestic brands. The number of German brands is less; European brands (except German brands) mainly include Italian and French brands, of which the Italian brands are relatively more; and domestic enterprises have tens of brands.
