In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Wall Socket market for 2018-2023.

A wall socket is a wall-mounted electrical receptacle that provides a point for consumers to plug in various electronic items. Wall outlets provide flexible access to electricity for use with a wide variety of components. Wall sockets make it easier and safer for occupants to power appliances, and are designed to minimize the risk of electrical shock, burns, and other related dangers.

The Major regions to produce wall socket are North America, Europe, China and Japan, which accounting for about 94 % of production in total. China is the largest production region (production share 58.22%).

Wall socket is mainly produced by Legrand, Schneider Electric, Siemens, Simon, S.A., Panasonic, Leviton, Vimar and Honeywell. And these companies occupied above 61.60% market share by sale value in 2015.

Along with the estate industry and ownership, North America, Europe, China and Japan are major consumption regions in wall socket market. The largest consumption region is China, accounting for 50.28% market share in 2015 by consumption volume. China is a promising region to be the fastest developing consumption region in the next few years.

The application of wall socket is residential application, commercial application, industrial application and other applications. Residential application is the major application, which accounts for more than 65% of consumption value. Commercial application is second large consumption filed of industrial plugs and sockets.

Although sales of wall socket brought a lot of opportunities, the industry barrier is rather high and the industry supply chain is rather closed. Therefore, the study group recommends the new entrants who just having money but without technical advantage

and downstream support, do not to enter into the wall socket field hastily.

Over the next five years, LPI(LP Information) projects that Wall Socket will register a 3.5% CAGR in terms of revenue, reach US\$ 4180 million by 2023, from US\$ 3400 million in 2017.
