In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Water Leakage Detector Systems market for 2018-2023.

Leaks in offices, hotels, museums, computer rooms, data centers or other commercial buildings can damage property, data, or customer goodwill. Water leak detection can either be done by periodically checking the areas and components of the house's plumbing system or by installing a commercially available water leak detection device. The Water Leakage Detector Systems industry concentration is not high. The leading companies own the advantages on better performance, more abundant product's types, better technical and impeccable after-sales service. Consequently, they take the majority of the market share of high-end market. Global leading companies such as Raychem (Tyco) who prefer setting up factories directly into aimed market, and taking own sales department to expand market. The giant companies are more likely to set their own big agents in some major countries taking charge of regional business building their international market position.

Asia-Pacific is the largest consumption region of Water Leakage Detector Systems, with a consumption market share nearly 40.20% in 2017. The second place is Europe; following Asia-Pacific with the consumption market share over 24.76% in 2017.

Over the next five years, LPI(LP Information) projects that Water Leakage Detector Systems will register a 4.9% CAGR in terms of revenue, reach US\$ 660 million by 2023, from US\$ 500 million in 2017.
