Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global White Board market for 2018-2023.

A whiteboard (also known by the terms marker board, dry-erase board, wipe board, dry-wipe board, pen-board, and the misnomer [citation needed] grease board) is any glossy, usually white surface for nonpermanent markings.

For industry structure analysis, the White Board industry is fragmented. A variety of manufacturers ranging from large multinational corporations to small privately owned companies compete in this industry. Some producers don't have its own brand and do the OEM. The top 5 producers account for about 22% of the sales market.

The production of White Board increases from 2145K Units in 2012 to 2565 K Units in 2016, with CAGR 4.57%.

For forecast, the global White Board revenue would keep increasing with annual growth rate with 2-3%, and a little higher speed in Asia-Pacific. We tend to believe that this industry still has a bright future, considering the current demand of White Board. As for product prices, the slow downward trend in recent years will continue in the next few years, as competition intensifies. Similarly, there will be fluctuations in gross margin.

Over the next five years, LPI(LP Information) projects that White Board will register a 2.2% CAGR in terms of revenue, reach US\$ 330 million by 2023, from US\$ 290 million in 2017.
