In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Wood Charcoal market for 2018-2023.

Charcoal is a wood fuel consumed in cities and towns. Some of the factors influencing the choice of using charcoal instead of firewood in urban areas include: Charcoal has a higher calorific value per unit weight than firewood, it is therefore more economical to transport charcoal over longer distances as compared to firewood; Storage of charcoal takes less room as compared to firewood; Charcoal is not liable to deterioration by insects and fungi which attack firewood; Charcoal is almost smokeless and sulphur-free, as such it is ideal fuel for BBQ in towns and cities.

Charcoal can be used as fuel in daily life. Generally, there are two types of charcoal, including charcoal briquets and charcoal lump. Difference between those two products is mainly raw material resource. Charcoal briquets use sawdust of scrap wood as raw materials, while charcoal lump uses natural hardwood. It seems that charcoal briquet is a major type of charcoal, which took a share of 63.30% in 2016.

Raw material of charcoal is wood and resource is abundant. There are many charcoal suppliers in USA, such as Kingsford, Royal Oak, Duraflame, Fire & Flavor, Cooks International, Fogo Charcoal, Two Trees Products, Kamodo Joe, Saint Louis Charcoal Company, B&B Charcoal, The Original Charcoal Company and The Charcoal Supply Company. Kingsford and Royal Oak are two leading local companies in USA. In 2016, Kingsford charcoal sales account for 74.75% of USA total sales. Royal Oak charcoal sales share is 15.11% in 2016. Market concentration in this industry is high in USA.

Over the next five years, LPI(LP Information) projects that Wood Charcoal will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in
