Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global X-ray Detectors market for 2018-2023.

X-ray detectors are devices use a scintillator to convert x-rays into visible light. They are used to measure the flux, spatial distribution, spectrum, and/or other properties of X-rays.

Asia is poised to be the fastest-growing region during the forecast period. The high growth in this market is attributed to the growing geriatric population, growing adoption of digital imaging systems, rising disposable income, growing number of awareness programs and symposia, and growing venture capital investments driving growth in the Asian market. However, High initial cost of Digital X-ray systems and stringent regulatory procedures for product launch may hinder the growth of this market during the forecast period. Meanwhile, the development of CMOS technology will improve the X-ray Detectors industry.

Over the next five years, LPI(LP Information) projects that X-ray Detectors will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
