The systems are also viewed as important screening tools for quality control and risk management, with their ability to detect contaminants, defects and inconsistencies in products. X-ray imaging offers superior precision, repeatability and high-speed capabilities. The report mainly focused on industrial x-ray inspection systems.

In the coming years there is an increasing demand for x-ray inspection systems in the regions of North America and Europe that is expected to drive the market for more advanced x-ray inspection systems. Increasing of automotive fields expenditures, more-intense competition, launches in introducing new products, increasing of spending on general industry, retrofitting and renovation of old technology, increasing adoption of x-ray inspection systems will drive growth in China markets.

Globally, the x-ray inspection systems industry market is low concentrated as the manufacturing technology of x-ray inspection systems is relatively matures than some high-tech equipment. And some enterprises, like YXLON International, Nikon Metrology, Nordson, GE Measurement & Control, etc. are well-known for the wonderful performance of their x-ray inspection systems and related services. At the same time, Europe, occupied 32% revenue market share in 2017, is remarkable in the global x-ray inspection systems industry because of their market share and technology status of x-ray inspection systems.

The consumption volume of x-ray inspection systems is related to downstream industries and global economy. As there will always be some uncertain in the global economy in the following years, the growth rate of x-ray inspection systems industry may not keep that fast. But it is surely forecasted that the market of x-ray inspection systems is still promising.

Over the next five years, LPI(LP Information) projects that X-ray Inspection Systems will register a 6.0% CAGR in terms of revenue, reach US\$ 1060 million by 2023, from US\$ 750 million in 2017.
