In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global X Ray Machine market for 2018-2023.

X-rays are a form of electromagnetic radiation, which have higher energy and can pass through most objects. X-ray machine is a kind of device for generating X-rays. An X-ray machine is composed of a control console which enables the X-Ray technician to select various X-Ray techniques suitable for that specific exam, an X-ray generator that creates and produces the desired KV (kilovoltage), MA (milliamperage sometimes referred to as MAS which is actually MA multiplied by the desired exposure length) and X-ray tube. The heart of an X-ray machine is an electrode pair - a cathode and an anode - that sits inside a glass vacuum tube. X-ray machine is widely used in medical and industrial fields.

Siemens Healthcare accounted for 12.81% of the overall X-Ray machine production volume market share in 2015. Other players accounted for 36.12%, including GE Healthcare, Philips Healthcare, Carestream, Agfa Healthcare.

United States giant manufactures mainly distributed in Northeast Region, Southeast Region and Great Lakes Region. They have unshakable status in this field. The key consumption markets also locate at Great Lakes Region and Southeast Region. Great Lakes Region takes the consumption volume market share of 25.51% in 2015, Southeast Region followed by with 23.03% in 2015.

The market is not only influenced by the price, but also influenced by the product performance. The leading companies own the advantages on better performance, more abundant product's types, better technical and impeccable after-sales service.

Consequently, they take the majority of the market share of high-end market.

Looking to the future years, the slow downward price trend in recent years will maintain.

As competition intensifies, prices gap between different brands will go narrowing. Similarly, there will be fluctuation in gross margin.

Over the next five years, LPI(LP Information) projects that X Ray Machine will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
