Aesthetic Device is a machine used for aesthetic purposes, including shaping, whitening, removing beverage and other non-surgical operation. It can be mainly divided into medical aesthetic devices and home aesthetic devices. In recent years, with the rise of the world's per capita spending level and the proportion of people taking on medical treatment and aesthetic treatment keep growing, aesthetic devices become more and more popular.

The United States is the largest market of Aesthetic Devices, which occupies average 36.12 percent of global Aesthetic Devices procedures per year. It is followed by Europe and China, which respectively have around 35 percent of the global total industry. Other main regions which take important part in this industry include Middle East and South America.

According to the research, the most potential market in the main countries of Aesthetic Devices industry is China, determined by its rapid growth of number of procedures. Besides, Southeast Asia, Middle East and India should also be focused by the investors. They are the potential consumers of Aesthetic Devices. India is also a rapidly developing economy.

The market of the Aesthetic Devices is growing fast due to people's more concentration on their body beauty. Although the market scale is still limited at present, but the potential is considerable.

The Aesthetic Devices market is consolidated in nature. Various players are adopting

competitive strategies such as collaborations, acquisitions and capitalizing untapped opportunities in the emerging economies of India and China, to sustain and gain market penetration across the globe.

Over the next five years, LPI(LP Information) projects that Aesthetic Devices will register a 5.3% CAGR in terms of revenue, reach US\$ 6620 million by 2023, from US\$ 4870 million in 2017.
