## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Agricultural fumigants are injected into the soil and move through the soil air and dissolve in the water in the soil where they kill pests, and also used on grains and crops post-harvest to reduce insects, ticks and mites, nematodes, slugs and snails and fungal diseases.

In the report, the statistics refer to agricultural fumigants as materials for fumigants pesticides. There are common fumigants materials such as Methyl Bromide, Phosphine, Chloropicrin, Metam Sodium, 1, 3-Dichloropropene.

The technical barriers of agricultural fumigants are not high, resulting in numerous manufacturing enterprises. In agricultural fumigants materials market, there are some relatively larger companies across the globe, such as Dow, AMVAC, ADAMA Agricultural, FMC Corporation, BASF, Syngenta, UPL Group, Detia-Degesch, Arkema, Chemtura, Eastman, and Solvay. Their plants mainly distribute in USA, China and Europe.

Agricultural fumigants materials are primarily used to produce fumigants pesticide, and eventually applied in soil and warehouse. With increasing of global population and economy, the demands for agricultural product keep high growth. With the improvement of people's health awareness, the product structure has been changed in these years and agricultural fumigants are expected to continue increasing during the remaining years of the forecast period of 2017-2022. Agricultural fumigants industry will usher in a stable growth space.

In the past few years, the price of agricultural fumigants has slightly decreased and we expect the price will slightly lower. However, the improvement of energy, transportation costs, employee wages, and equipment depreciation will play a significant role in

promoting the cost of agricultural fumigants.

Over the next five years, LPI(LP Information) projects that Agricultural Fumigants will register a 2.7% CAGR in terms of revenue, reach US\$ 1390 million by 2023, from US\$ 1180 million in 2017.
