Airbag is a soft pillow to land against in a crash. Airbags can inflate in less than a tenth of a second to protect people from the forces of a head-on collision. Since introduced in the early 1980s, airbags have saved thousands of lives. Now, airbag has been a necessary part of automotive.

With enormous automobile population, the growth rate of airbag production will be slightly larger than the growth rate of automotive industry itself. And the airbag products have a large potential market in China, for the side airbag and knee airbag, etc. Due to the improvement of technology, there will be more manufacturers enter this industry in the future. The market competition will be fierce that the influence of technology and materials will be larger.

Over the next five years, LPI(LP Information) projects that Airbag will register a 2.6% CAGR in terms of revenue, reach US\$ 14500 million by 2023, from US\$ 12400 million in 2017.
