Aeroengines are highly sophisticated and sophisticated thermal machines that provide the aircraft with the engine needed for flight. As the heart of the aircraft, it is known as the “flower of industry”. It directly affects the performance, reliability, and economy of the aircraft. It is an important manifestation of the national science and technology, industry, and national defense strength. At present, the only countries in the world that can independently develop high-performance aero-engines are the United States, Russia, the United Kingdom, and France. The technical threshold is high.

The global aircraft engine, parts, and equipment market encompasses landing gear, aircraft engines, engine parts, propeller, hydraulic and electric control, rotor, fuselage, and avionics systems. Among them, engines and other component parts account for a significant share in market. The key segments of the global aircraft engine, parts, and equipment market are Asia Pacific, North America, Europe, and the Rest of the World. North America, among them, dominates the market on account Canada, which leads in the production of turbine-powered aviation engines for business and commercial aircraft and copters. The U.S. is another prominent market in the region. Europe is another major market that follows North America in terms of market share. France, and the U.K. are major producers of aircraft parts in Europe.

Over the next five years, LPI(LP Information) projects that Aircraft Engine and Equipment will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
