Auto Transmissions is a machine that consists of a power source and a power transmission system, which provides controlled application of the power. Often the term transmission refers simply to the gearbox that uses gears and gear trains to provide speed and torque conversions from a rotating power source to another device.

China Auto Transmissions industry is relatively concentrated, there are not many manufacturers in the China, especially when it comes to auto-shift transmissions, there is only less than 30 companies who can commercially produce auto-shift transmissions in China in few years ago. However nowadays, more and more multi-national auto-shift transmissions manufacturers have built local plant in China to meet the demand of the huge Chinese vehicle market, such as Volkswagen, Aisin, JATCO, GETRAG, Honda, MOBIS.

Meanwhile there are more and more Chinese local manufacturers such as Chery, Geely and Chongqing Tsingshan, have stepped into the auto-shift transmissions market, All manufactures in the world are committed to the improvement of product. These two years, some of Chinese manufactures can almost catch up with the world's leading technology too. Most technologies are developed by the manufacturers instead of importing from other companies.

In terms of transmissions types used in China vehicle market, manual transmission (MT) is losing its market share steadily during last few years, on the other side, auto-shift transmissions (AT, CVT, DCT and AMT) are more and more popular nowadays.

Over the next five years, LPI(LP Information) projects that Auto Transmissions will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx

million in 2017.
