Connectors are critical to today's cars. Without them, it would be nearly impossible to build or service a car. Whenever a bundle of wires passes through or attaches to a component of the car that might have to be removed, there must be a connector there to allow for that removal. A single connector can have more than 100 wires.

Advanced Automotive Connectors manufacturers are from developed regions like North America, Europe and Japan. While some of them have built plant in China to meet local market demand.

Europe is the largest consumption market with market share over 28%. Followed Europe, North America is the second largest market with share about 23.5%. China manufacturing more than 28 million unit new cars in 2016, but the market size is still in the third place due to the low consumption amount per car.

Over the next five years, LPI(LP Information) projects that Automotive Connectors will register a 6.1% CAGR in terms of revenue, reach US\$ 21600 million by 2023, from US\$ 15100 million in 2017.
