Automotive night vision system (NVS) is an advanced driver assistance systems that help increase driver awareness when it’s dark out. The system extends the perception of the driver beyond the limited reach of the headlights through the use of thermographic cameras, infrared lights, heads up displays, and other technologies. Since automotive night vision can alert drivers to the presence of potential hazards before they become visible, these systems can help prevent accidents.
Market competition is not intense. The production proportion of top 3 is 78.3% in 2015.
