Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

A baby bottle is a bottle with a nipple to drink directly from. It is typically used by infants and young children when a mother does not breastfeed. A baby bottle is usually made from glass and plastic materials.

Due to global gradually slow neonatal growth speed, baby bottle market developed smoothly in recent years. At present, USA, Europe and China are the main consumption market of baby bottle. Developing countries in Africa, Asia and South America are emerging market and will be more important in future. Viewed from the supply side, there are many manufacturers in the baby bottle industry, while from the demand side; the current demand for baby bottle is growing.

At present, there are a mass of manufacturers in the market. Leading six companies in the market occupies about 22.90% of the market shares. Major manufacturers in the market are Pigeon, Avent, NUK, Playtex, Dr. Brown's and Nuby.

As downstream demand grows and technical barriers become less, there will be a huge market space for baby bottle. To grab more market, the little companies have to expand the technology, capital investment and brand influence. To meet the challenge of new entrants and keep their leading stage, leading companies need to increase the technology innovation and speed up the product upgrading. In the future, baby bottle market will still be a market of fierce competition.

Over the next five years, LPI(LP Information) projects that Baby Bottles will register a 7.2% CAGR in terms of revenue, reach US\$ 2310 million by 2023, from US\$ 1520 million in 2017.
