Brake caliper is an essential component of disc braking system, which is one of the most common types of braking system found in cars and motorcycles. In a braking system, wheels are attached to discs or rotors, and the job of the caliper is to slow the wheels by creating friction with the rotors.

Inside each caliper is a pair of brake pads, which are like metal shoes lined with some kind of friction material. When the brake pedal is pressed, the master cylinder will force brake fluid into the caliper through a series of tubes or hoses. Then the connected pistons will push the brake pads against the rotor, creating the friction to stop or slow down the wheels.

Now, with excellent performance, disk braking system is selected by most cars, especially used in the front wheels. This report brake calipers refers automotive brake calipers type, while we can also offer any product survey report related to the Brake Calipers industry chain.

In the world wide, major manufactures mainly are ZF TRW, Continental, Akebono, Brembo, Aisin, Bosch, Mando, ACDelco, APG, Nissin Kogyo, Knorr-Bremse, Huayu, Wabco, Meritor, Tarox, BWI, Wilwood, Haldex, LiBang, Centric Parts, Qingdao Huarui, Alcon, K Sport, Yuhuan Boyu and etc.

The main consumption regions are concentrated in the China and Europe and North America. The automotive disc brake's consumption has great relationship with the local

automotive production and economic level. The developing countries have little consumption.

The import and export business of this industry is not frequent. The main reason lies in that many international manufacturers expand their business through building factories or investments in targeted markets. Also, many major players have built up plants in developing countries, like India and Thailand.

Currently, the Automotive Disc Brake has a certain degree of anti-dumping phenomenon. The import specification and volume depends the local consumption.

Over the next five years, LPI(LP Information) projects that Brake Calipers will register a 3.4% CAGR in terms of revenue, reach US\$ 13400 million by 2023, from US\$ 10900 million in 2017.
