Calcium tablets are elemental forms of calcium, an essential mineral for human health that may be taken to supplement calcium obtained from dietary sources or to address a calcium deficiency. Most supplements contain one of two forms of calcium—calcium carbonate and calcium citrate. Since vitamin D is needed to help the body absorb calcium, many calcium supplements also contain vitamin D.

Calcium is the most abundant mineral in the body. Between one and two percent of body weight is calcium—the average male has about three pounds of calcium; the average female contains about two pounds—and nearly all of it—99%—is concentrated in the bones and teeth. The remaining one percent is in the cells of the body, blood, and extracellular fluid (the fluid between cells).

The classification of Children, Adult and The Aged, and the proportion of The Aged in 2016 is about 42%. And the market share of children is about 32.4%.

Calcium Tablets are widely used in Pharmacy, Hospital, Online and other. The most proportion of Calcium Tablets is used in Pharmacy and the consumption proportion in 2016 about 45%.

Market competition is intense. Pfizer, A&Z Pharmaceutical, Zhendong Group, HPGC, etc. are the leaders of the industry, and they hold key technologies and patents, with high-end customers; have been formed in the monopoly position in the industry.
