Camphene is a type of organic compounds, and belongs to bicyclic monoterpene. It is nearly insoluble in water, but very soluble in common organic solvents. It volatilizes readily at room temperature.

As an important organic synthetic material, camphene is widely used in flavor & fragrance, synthetic material and pesticide. Flavor & fragrance is the largest application of camphene, taking 58.15% of the world camphene consumption in 2015. Givaudan, Firmenich and IFF are the main consumers in this field.

The level of concentration of the camphene industry is relatively high. Manufacturers mainly distribute over China and India, like Saptagir Camphor, Camphor & Allied Products, Dujodwala Resins & Terpenes, Kanchi Karpooram, Fujian Green Pine, Suzhou Youhe Science and Technology and Sky Dragon. Among them, Fujian Green Pine is the largest manufacturer accounting for 19.29% of the global camphene production in 2015, follow by Saptagir Camphor with 11.72% market share. The production scale of Russia and Mexico manufacturers such as Origsintez OJSC and AIE Industries is relatively small, only take for 4.89 and 3.83 percent of the global total production.

It is expected that the camphene consumption will be 15275 MT in 2022 and the sales revenue will reach 38.25 million USD. At the same time, the price may continue to decline. This industry is easily affected by the market demand and the policy. The future is unknown, and the camphene development will based on the market demand and the policy of the producers. 2016 will be very complicated, due to the expectations for an interest-rate increase from the Federal Reserve, and the currency devaluation of China, India and other countries.

Over the next five years, LPI(LP Information) projects that Camphene will register a 4.9% CAGR in terms of revenue, reach US\$ 40 million by 2023, from US\$ 30 million in 2017.
