As the name means, carpet manufacturing machines refer to types of machine and equipment used in the manufacturing or production of carpets.

There are various kinds of carpet seen worldwide, with different raw materials, different shapes, different sizes or different production methods. According to the production methods, there are tufted carpets, Wilton carpets, Axminster carpets, hand-woven carpets and handmade bayonet carpets.

Various machines and equipment are needed for the production of different types of carpets, whether machine made carpets or handmade carpets (currently, the production of handmade carpets also generally needs many handheld machines). In this report, we will mainly analyze the market of carpet manufacturing machines used in the production of machine made carpets. And as there are quite various machines, unnecessary and meaningless to introduce all the machines. Tufting machines, Wilton Carpet Loom and Axminster Carpet Loom, the most important and essential machines for machine made carpets, are chosen to be analyzed in this report. And as the production volume of Wilton Carpet Loom and Axminster Carpet Loom is much smaller than the production volume of tufting machine, and the price of Wilton Carpet Loom and Axminster Carpet Loom is much higher than the production volume of tufting machine; we will give detailed market data of tufting machine while analyzing the market of Wilton Carpet Loom and Axminster Carpet loom briefly.

As Chinese overall economic downward trend in the past few years, and international economic situation is complicated, in the next few years there will be many

uncertainties, and coupled with carpet manufacturing machines industry in short supply on the market in the past few years, more and more companies enter into carpet manufacturing machines industry.
