This report studies the Cellulite Reduction Devices market, it's believed that cellulite impacts as many as 90% of women at some point in their lifetime due to hormonal changes, genetics, diet, and other lifestyle factors. Cellulite is clearly a common problem that many patients are eager to address without surgery or drastic lifestyle changes. Cellulite Reduction Devices can reduce cellulite.

There are four different grades of cellulite and it's easy to know what you have; get under some good lighting to find out where yours stands.

Grade 1 – Even when skin is pinched, there's no visible cellulite.

Grade 2 – When skin is pinched, you can see an orange peel effect appear. However, when you stand or lay down, it is invisible.

Grade 3 – When you stand, cellulite is visible, but disappears when you lay down.

Grade 4 – Cellulite is visible when standing or laying.

The Cellulite Reduction Devices industry concentration is not very high; there are several manufacturers in the world, and mainly located in Europe and USA. The key players are Syneron Candela, LPG, Cynosure, Ulthera and Venus Concept etc.

The key consumption markets locate at developed regions, like Europe, USA and Japan. The USA takes the market share of 43.01%, followed by Europe with 24.20%, Japan with 6.07%. China's consumption market is relatively small; it takes about 8.91% in the year 2017. However, we think developing area will occupy more share because of the large population base and fast growing of resident income.

It can be split into Non-invasive Devices and Minimally-invasive Devices, the Non-

invasive Devices will occupy more share because it has less risks and complications. At-home product also will occupy more because they are portable and cheaper

Over the next five years, LPI(LP Information) projects that Cellulite Reduction Devices will register a 10.2% CAGR in terms of revenue, reach US\$ 380 million by 2023, from US\$ 210 million in 2017.
