Cellulose acetate is a natural plastic, which is manufactured from purified natural cellulose. Natural cellulose of the appropriate properties is derived primarily from two sources, cotton linters and wood pulp.

The cellulose acetate industry concentration is high. The world wide, giant manufactures mainly distribute in American, Europe and Japan, such as Celanese, Eastman, Daicel and Solvay, all have perfect products. In China, the main manufacture is Sichuan Push Acetati.

In recent years, some countries and regions were gradually introduced no-smoking policy, cellulose acetate industry also been affected. In order to offset the weakening consumption trend in cigarettes market, major companies are redirecting R&D efforts towards improving the functionality of cellulose acetate.

All manufactures in the world are committed to the improvement of product. These two years, the Chinese manufacture Sichuan Push Acetati can almost catch up with the world's leading technology.

Cellulose acetate can be calssfied as two types, cellulose diacetate and cellulose triacetate. It can be widely used in many industries. Survey results showed that 75.14% of the cellulose acetate market is cigarette filter industry, 9.16% is fabrics industry, 5.33% is film industry, 4.32% is molded plastics industry and 6.05% divided among other industries in 2015.

The major raw material for cellulose acetate is wood pulp, acetic anhydride, etc. On the global market, supply of raw materials is full. Fluctuations in the price of the upstream product will impact on the production cost of cellulose acetate industry.

We tend to believe this industry is an promising industry, and the consumption

increasing degree will show a smooth growth curve. For product prices, the slow downward trend in recent years will maintain in the future as competition intensifies. Besides, prices gap between different brands will go narrowing gradually. Also, there will be fluctuation in gross margin.

Over the next five years, LPI(LP Information) projects that Cellulose Acetate - A will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
