## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Commercial Vacuum Cleaners cover the following types, Upright. These vacuums are one standing unit with the nozzle at the base of the unit, they usually have more capacity and power than canister/ backpack vacuums but are heavier to maneuver.

Canister (Shoulder Strap/ Handheld). These vacuums come with two parts, the nozzle and the body where the debris is collected which are connected by a hose. Shoulder strap/ Handheld vacuums are easier to carry around and are ideal if you will need to vacuum stairs.

Cylinder. Similar to canister vacuums, backpack vacuums also feature two parts and are worn like a backpack so are also ideal for vacuuming offices/ spaces with stairs. As international economic situation is complicated, in the next few years there will be many uncertainties although. Due to the government' policy and the high production of vacuum cleaner in the international market, the current demand for vacuum cleaner product is relatively high in the mature market, such as Japan, EU, and US, but the demand in China is low due to the downstream demand.

Vacuum cleaner is mainly produced by Panasonic, Nilfisk and Haier. The most popular brands are Hoover, TTI and Shark Royal, and these companies occupied about 7.4% market share in 2015.

Japan, USA, EU are major consumption regions in vacuum cleaner industry market. Although sales of Vacuum cleaner brought a lot of opportunities, the study group recommends the new entrants who just having money but without technical advantage and downstream support, do not to enter into the vacuum cleaner field hastily.

Over the next five years, LPI(LP Information) projects that Commercial Vacuum Cleaners will register a 2.6% CAGR in terms of revenue, reach US\$ 8810 million by 2023, from US\$ 7540 million in 2017.
