Condom is a sheath-shaped barrier device that may be used during sexual intercourse to reduce the probability of pregnancy and spreading sexually transmitted infections (STIs/STDs) such as HIV/AIDS. It is rolled onto an erect penis before intercourse and blocks ejaculated semen from entering the body of a sexual partner. Condoms are also used during fellatio and for collection of semen for use in infertility treatment. In the modern age, condoms are most often made from latex, but some are made from other materials such as polyurethane, polyisoprene, or lamb intestine.

The main consumption regions are relative dispersion. The Condom's consumption has great relationship with the local economical developed level and population. Currently, the largest consumption region is pacific coast. The Trojan brand occupies the largest markets share.

The import volume is very large; the consumption volume of USA mainly depends on import. Currently, the Condoms have a certain degree of anti-dumping phenomenon. In the future, the Condoms will have a good future; the price fluctuation has relationship with the raw material and brand effect. The technology will more mature and the monopoly phenomenon will be weaken.

Over the next five years, LPI(LP Information) projects that Condoms will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
