Floriculture is a branch of horticulture addressing flower and ornamental plant cultivation and propagation of flowering plants for gardens, greenhouses, nurseries and landscapes comprising the floral industry. Floriculture crops include bedding plants, houseplants, flowering gardens and potted plants, cut cultivated greens, and cut flowers.

As for consumption, Europe is also the largest consumer of consumer floriculture, with 53.24% consumption share. North America and China are also key consumers. In addition, on the consumption side of the business, the rise of online consumer floriculture sales is definitely one of these trends.

In export market, the Netherlands is still a major junction in global cut flower trade, but the four cut flower exporters close to the equator—Colombia, Kenya, Ecuador and Ethiopia—are gathering speed. The Netherlands plays a key role in the global cut flowers trading as it has more than 40% export share. When refers to the import side, Europe, USA and Japan are the major importers.
