Drilling Machine is a complex machine consisting of a machine, a crew, and a mechanism. Drilling rigs are mechanical devices that drive drilling tools to drill underground and obtain physical geological data in the exploration or development of mineral resources such as solid ore, liquid ore and gas ore. Also known as drilling machine. The main role is to drive the drilling tool to crush the rock at the bottom of the hole, and to drill or raise the drill in the hole. It can be used to drill cores, cuttings, gas samples, liquid samples in order to explore underground geological and mineral resources.

First of all, increasing demand for Drilling Machine Market is expected to result in the growth of the market. Rapid industrialization in the Asia-Pacific region drives the demand of drilling machine in this region. Venezuela, Kuwait, Saudi Arabia, UAE, Canada, Iran and Iraq are to witness a significant growth over the forecast period owing to discovery of new oil reserves in these areas. Second, this industry research report identifies the exponential increase in the demand for fabricated metal products to be one of the major factors that will have a positive impact on the growth of this market in the coming years. This is because fabricated metals are mainly used in manufacturing and construction. The rise in demand for fabricated metals across the globe will boost the growth of the drilling equipment market. APAC is expected to witness rise in demand for drilling equipment, and China and South Korea is estimated to dominate this market in forecast period year.

Over the next five years, LPI(LP Information) projects that Drilling Machine will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in

2017.
