Endoscopy has lots of application in medical and industrial field for looking inside of the body or machine.

Endoscopy Visualization System Components are the main parts of one endoscopy visualization system, to make the detected part be visualized to patients and doctors. The components include Light Source, Camera Head, Video Processor, Monitor and other accessories (such as light cable etc.).

Currently, US Endoscopy Visualization System Components industry has a rapid development due to the demand of precise medical treatment and economy improvement. For another, industrial field detected demand also promotes the growth of the industry. For the regions of US, those with high economy condition have a large consumption of Endoscopy Visualization System Components, such as Northeast US and Southern US. For the major suppliers, Stryker has a relatively large market share in US, followed by Olympus and Conmed.

Technology of Endoscopy Visualization System Components is relatively high, as a result, only a few manufacturers can provide these components, such as medical grade Light Source and Camera Head. Therefore, the industry is relatively concentrated.

Over the next five years, LPI(LP Information) projects that Endoscopy Visualization System Components will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
