Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Fans and blowers are machines whose primary function is to provide and accommodate a large flow of air or gas to various parts of a building or other structures. This is achieved by rotating a number of blades, connected to a hub and shaft, and driven by a motor or turbine.

For industry structure analysis, the Fans and Blowers industry is not concentrated. These manufacturers range from large multinational corporations to small privately owned companies compete in this industry. The top five producers account for about 26 % of the revenue market. Regionally, North America is the biggest production value area of valves, also the leader in the whole Fans and Blowers industry.

For forecast, the global Fans and Blowers revenue would keep increasing with annual growth rate with 1~3%. We tend to believe that this industry still has a good future, considering the current demand of Fans and Blowers.

Over the next five years, LPI(LP Information) projects that Fans and Blowers will register a 1.4% CAGR in terms of revenue, reach US\$ 5800 million by 2023, from US\$ 5330 million in 2017.

This report studies the global market, especially in North America, Europe, Asia-Pacific, South America, Middle East and Africa, focuses on the top 5 players in each region, with sales, price, revenue and market share from 2013 to 2018, the top players:
