Flight safety camera systems are a kind of camera system which installed in the cabin of the airplane or out to help pilots to ensure safety in the flight. Flight safety camera systems include CDSS (Cockpit Door Surveillance System), Cabin Surveillance System, etc.

At first, these flight safety camera systems are applied in the prevention of terrorist activities. In addition, Flight safety camera systems can also help pilots get more information and have a better drive experience.
At present, cost of production is still high. Cost reduction will be an important factor of the flight safety camera system development in future. Besides that, high clarity, intelligence and networking will be the technical trend of flight safety camera system. To grab more market, backward companies have to expand the technology, capital investment and brand influence.
