Gas Canisters, also called fuel cell, are used in gas powered nail gun to provide power source. The potential for power from combustion technology is greater than that from batteries, and that's why all cordless framing nailers run on gas.

Gas canisters for nail gun industry is quite relevant to gas nailer industry and is a niche market. Market concentration is relatively high, with top three manufacturers taken more than 50% in terms of both revenue and volume in 2015. The largest market player, Paslode, the gas nailer inventor, has the largest market share of more than 30%.

US is the largest consumption region, which accounts for just less than 30%, followed by Europe and China.

Although sales of Gas Canisters for Nail Gun products bring a lot of opportunities, the study group recommends the new entrants who just have money but without technical advantage, raw materials advantage and downstream support, do not enter into the Gas Canisters for Nail Gun field hastily.

Over the next five years, LPI(LP Information) projects that Gas Canisters for Nail Gun will register a 2.7% CAGR in terms of revenue, reach US\$ 200 million by 2023, from US\$ 170 million in 2017.
