Glycoproteins are proteins that contain oligosaccharide chains (glycans) covalently attached to polypeptide side-chains. The carbohydrate is attached to the protein in a cotranslational or posttranslational modification. This process is known as glycosylation. Secreted extracellular proteins are often glycosylated.

As international economic situation is complicated, in the next few years there will be many uncertainties. Due to the government' policy and the high consumption of Glycoprotein in the international market, the current demand for Glycoprotein product is relatively large in the mature market, such as North America and Europe, but in developing countries, the level of health care is very low.

Glycoprotein is mainly manufactured and sold by Sigma, Creative Diagnostics, R&D Systems, Enzo Life Sciences, Thermo Fisher Scientific, Epitope Diagnostics, BD Biosciences; and these companies occupied about 91.08% market share in 2016.

Geographically, North America is the largest sales market in the world, which took about 51.88 percent of the global consumption volume in 2016.

Over the next five years, LPI(LP Information) projects that Glycoprotein will register a 1.3% CAGR in terms of revenue, reach US\$ 490 million by 2023, from US\$ 460 million in 2017.

This report studies the global market, especially in North America, Europe, Asia-Pacific, South America, Middle East and Africa, focuses on the top 5 players in each region, with sales, price, revenue and market share from 2013 to 2018, the top players:
