Inverter Welding Machine is a type of welding power supply that takes the inverter technology. Relative to normal welders, Inverter welders cost less energy and occupy less space.

Recent years, the sales of Inverter Welding Machine industry are largely affected by the world economy. To the global market, the China market has a certain development space, because that the China is the largest steel production country; meanwhile, the government of China is implementing the reform of steel industry.

About the price, the High-end automation products is expensive than the most commonly used products, such as Stick Welding machine; the price of product from different manufacturers is very different, Europe and US's product is expensive than Japan and China. Usually, EU and US's product price is several times than domestic product.

New enterprise can cooperate with the leading company, such as Lincoln, and also must strengthen the study of the product, to promote the company's products to obtain industry competitiveness and market share.

Over the next five years, LPI(LP Information) projects that Inverter Welding Machine will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
