## Abstracts

Kitchen cabinets are the built-in furniture installed in many kitchens for storage of food, cooking equipment, and often silverware and dishes for table service. Appliances such as refrigerators, dishwashers, and ovens are often integrated into kitchen cabinetry. Kitchen Furniture production enterprises are much less concentrated than in other industries and most of these are small and medium-sized. As a result of the low industry concentration, there are hardly any brands with strong influence in the market. However, after years of competition, a number of branded enterprises of a certain scale and possessing considerable strength have emerged. In South Korea domestic market, Hanssem takes the largest share of Kitchen Furniture for many years based on its strong sales channel.

Today, Kitchen furniture brands are no longer fighting for first-tier cities but are gradually shifting their focus to the furniture market in second- and third-tier cities. New construction and Kitchen remodeling has also spurred the growth of home marts in second- and third-tier cities. Besides, the market for Kitchen furniture marts and brands is almost saturated in first-tier cities. While the economic and consumption scale is smaller in second- and third-tier cities, the market offers more room for development. So tapping into the medium- and low-end market will become a key marketing strategy.

Over the next five years, LPI(LP Information) projects that Kitchen Cabinet will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.

This report studies the global market, especially in North America, Europe, Asia-Pacific, South America, Middle East and Africa, focuses on the top 5 players in each region, with sales, price, revenue and market share from 2013 to 2018, the top players:
