LED Billboard Light offers a unique modular family of solid state LED lighting products that can replace your existing metal halide or high pressure sodium traditional lighting sources with long lasting energy saving LED based billboard luminaire.
At present, in the foreign industrial developed countries the LED Billboard Lights industry is generally at a more advanced level, the world's large enterprises are mainly concentrated in Asia.
Despite the presence of competition problems, due to the clear global recovery trend, investors are still optimistic about this area and in future still more new investment will enter into the field. Technology and cost are two major problems.
Although sales of LED Billboard Lights brought a lot of opportunities, for the new entrants with only advantage in capital without sufficient support in technology and downstream channels, the research group did not recommend taking risk to enter this market.
Over the next five years, LPI(LP Information) projects that LED Billboard Lights will register a 1.6% CAGR in terms of revenue, reach US$ 350 million by 2023, from US$ 320 million in 2017.
