Medical Gases are fluids manufactured specifically for the medical, pharmaceutical manufacturing, and biotechnology industries. They are frequently used to synthesize, sterilize, or insulate processes or products which contribute to human health.

The medical gases market concentration is high and the global market is dominated by few companies like Air Liquide (Airgas), Linde Healthcare, Praxair, Air Products and Taiyo Nippon Sanso Corporation (Matheson Tri-Gas Inc.). These giants are dominating the medical gases market, from the manufacturing, distribution to service, occupying for over 84 percent of global market. The giants expand their market through mergers and acquisitions, building the global production and distribution network, from the developed countries to the emerging countries. In few future years, the market will become more concentrated in only few companies, and the market competition pattern will be very difficult to change.
