A public address system (PA system) is a sound amplification system used to allow a person or persons to address an audience at a greater volume than would be possible or practicable without such a system.

The Global PA Systems market are fragmented, there are several famous players in the world, mainly from USA, Western Europe and Japan, which have a long history, they also set up plants in China.

The key consumption markets locate at NA and China in 2016. China takes the market share of 23.93%, followed by NA with 19.14%.

Prices vary widely with the brand from ten dollars to several thousands of dollars.

Looking to the future years, the slow downward price trend in recent years will maintain.

As competition intensifies, prices gap between different brands will go narrowing.

Similarly, there will be fluctuation in gross margin.

We tend to believe this industry becomes more and more mature, and the consumption increasing rate will show a smooth curve.

Over the next five years, LPI(LP Information) projects that PA Systems will register a 1.8% CAGR in terms of revenue, reach US\$ 1690 million by 2023, from US\$ 1520 million in 2017.

This report studies the global market, especially in North America, Europe, Asia-Pacific, South America, Middle East and Africa, focuses on the top 5 players in each region, with sales, price, revenue and market share from 2013 to 2018, the top players:
