PE pipe resin refers to PE resin which is mainly used during the production process of PE pipe. Currently, the most widely used PE resin is PE 80 and PE 100.

HDPE pipe systems provide sustainable and harmless solution to growing demand for clean water and modern sewer systems. The new applications in the field of storm water drainage, marine crossing, intake and outfall, fire loops, district heating and domestic geothermal technology rely on superb properties of HDPE material, its long service life and thriving long track record of more than 60 years.

The PE pipe resin market was dominated by several international petrochemical companies, such as LyondellBasell, Dow, Borealis and so on. The top 5 producers contributed about 50% sales share globally. The market is relatively concentrated.

With gradual recovery of global economy, plastic pipe industry will become promising in the coming few years. PE pipe is competing with PVC pipe and PP pipe in the plastic pipe industry. With distinctive characteristics, PE pipe will be used more and more common in some field, such as water supply system, gas & oil industry, etc. Market insiders predict that stimulated by the pipe industry, global PE pipe resin market will reach to 7000 million USD in the year of 2023.

Over the next five years, LPI(LP Information) projects that PE Pipe Resin will register a 2.5% CAGR in terms of revenue, reach US\$ 6970 million by 2023, from US\$ 6010 million in 2017.
