Peony is a flowering plant in the genus *Paeonia*, the only genus in the family *Paeoniaceae*. Peony varieties with huge, double flowers will be the focal point of the garden when they bloom in early summer. Single-flowered types are more subtle and combine well with other perennials. Flower colors include pink, red, white, and yellow, and the plants grow 18 inches to 3 feet tall, depending on the variety. Peonies make an attractive low hedge. However, they can take up to 3 years to mature, and don't perform well in hot summer climates.

Currently, the Netherlands peony occupy the absolute position, but the next few years there will be some change in the situation, his market will gradually be swallowed by other countries, especially China and the United States.

Although the Peony market is fire, but because they need high technology to storage and transport, meanwhile with high inspection standards, if cannot supported by the facilities, research do not recommended for new manufacturers to enter the field.

Over the next five years, LPI(LP Information) projects that Peony will register a 3.5% CAGR in terms of revenue, reach US\$ 540 million by 2023, from US\$ 440 million in 2017.

This report studies the global market, especially in North America, Europe, Asia-Pacific, South America, Middle East and Africa, focuses on the top 5 players in each region, with sales, price, revenue and market share from 2013 to 2018, the top players:
