Phosphatidylserine is an amino acid derivative compound similar to a dietary fat which is highly prevalent in human neural tissue. Typically it is white or light yellow loose powder but also a small amount of phosphatidylserine is liquid. It is vital for cognitive function. Phosphatidylserine supplementation in older individuals seems to improve memory and cognitive capacity.

It is from soy or cabbage derivatives and used as functional ingredient for dietary supplement as well as functional foods.

In 2015, the global Phosphatidylserine consumption market is led by Europe. America is the second-largest region-wise market. At present, the major manufacturers of Phosphatidylserine are concentrated in Europe and Asia-Pacific. Chemi Nutra is the world leader, holding 15.80% production market share in 2015.

According to our research and analysis, manufacturers from Israel and EU are the major leaders in the international market of Phosphatidylserine. Manufacturers from China are immature in technology. There is large space in the China market, as well as big gap between international brands and local brands on price. With the development of Chinese Phosphatidylserine production technology, their share in the global market is increasing, and competitiveness in the global market gradually increases.

Phosphatidylserine downstream is wide. Globally, the Phosphatidylserine market is mainly driven by growing demand for dietary supplement and functional foods.

Fundamentally speaking, people's strong desire for healthy lifestyle promotes the development of this industry.

Global market is expected to witness significant growth on account of rising applications, so in the next few years, Phosphatidylserine production will show a trend

of steady growth. In 2020 the production of Phosphatidylserine is estimated to be 322.7MT, and the consumption increasing degree will be high. On product prices, the slow downward trend in recent years will maintain in the future.

Over the next five years, LPI(LP Information) projects that Phosphatidylserine will register a 10.2% CAGR in terms of revenue, reach US\$ 130 million by 2023, from US\$ 75 million in 2017.
