Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Single vision lenses have just one prescription, distributing focus evenly over the entire surface of the lens. They are particularly suitable for correcting myopia (nearsightedness), hyperopia (farsightedness), astigmatism and so on.

The industry is expected to remain innovation-led, with frequent acquisitions and strategic alliances adopted as the key strategies by the players to increase their industry presence. Meanwhile, optimize product mix and further develop value-added capabilities to maximize margins.

The Asia Pacific region is estimated to be the key market over the forecast period, owing to the increasing demand. All manufactures in the world are committed to the improvement of product. These two years, some of Chinese manufactures can almost catch up with the world's leading technology too. Most technologies are developed by the manufacturers instead of importing from other companies.

Over the next five years, LPI(LP Information) projects that Single Vision Lenses will register a 0.1% CAGR in terms of revenue, reach US\$ 6840 million by 2023, from US\$ 6800 million in 2017.

This report studies the global market, especially in North America, Europe, Asia-Pacific, South America, Middle East and Africa, focuses on the top 5 players in each region, with sales, price, revenue and market share from 2013 to 2018, the top players:
