The report requires updating with new data and is sent in 48 hours after order is placed.

Snow Helmet refers to the equipment used to protect the head in the ski sport. Snow Helmets are different from bike or skateboard helmets. They have specific features such as ear coverage, moisture-wicking liners and temperature-sensitive materials.

Due to the cheap labor cost and other factors, some Chinese enterprises provide OEM services for the foreign famous enterprises, which accounted for 40% of the global market share. In order to enhance its competitiveness and visibility, we suggest these enterprises through the acquisition of enterprises, cooperating with the European and American brands, or take advantage of price going into the market gradually enhance their market share.

China has contributed about 1.46% of the ski enthusiasts, far less than Japan's 3.06%, this imbalance shows that China is the world's most potential market under the situation of that Japan and South Korea ski market has been basically stable.

With the Chinese national policy support and the Winter Olympics promotion, the high growth rate can maintain 3-5 year, we conservatively estimate the snow helmet consumption market in China will reach the scale of 6 million USD.

Over the next five years, LPI(LP Information) projects that Snow Helmet will register a 4.1% CAGR in terms of revenue, reach US\$ 290 million by 2023, from US\$ 230 million in 2017.
