Soft Ferrite Core are those materials that are easily magnetised and demagnetised. They are used primarily to enhance and/or channel the flux produced by an electric current.

Soft Ferrite Core are used extensively in power electronic circuits, as voltage and current transformers, saturable reactors, magnetic amplifiers, inductors, and chokes. These magnetic devices may be required to operate at only 50/60 Hz, or at frequencies down to dc or over 1 MHz.

At present, in developed countries, the Soft Ferrite Core industry is generally at a more advanced level. The world's large enterprises are mainly concentrated in Japan and China. Meanwhile, foreign companies have more advanced equipment, strong R & D capability, and leading technical level. However, foreign companies' manufacturing cost is relatively higher, compared with Chinese companies. With the development of Chinese Soft Ferrite Core production technology, their share in the international market is increasing, and competitiveness in the international market gradually increases.

China's Soft Ferrite Core industry has developed into a national wide status with certain research and production capacity, industry product mix has gradually improved, currently. China has become a large international consumption country of Soft Ferrite Core, but the production technology is relatively laggard to produce some low-end product. Although the new production lines are increasing, and the high-end product is still relying on import.

With the rapid growth of the national economy as well as the rapid development of downstream industries, consumer electronics product keep stable growth in china, the automobile electronics is also growing in the downturn global economy situation. Chinese Ferrite Cores market demand is exuberant, which provide a good opportunity for the development of Ferrite Cores market and technology.

Although Soft Ferrite Core brings a lot of opportunities, the study group recommends the new entrants just having money but without technical advantage and upstream and downstream support do not to enter into this field.

Over the next five years, LPI(LP Information) projects that Soft Ferrite Core will register a 1.1% CAGR in terms of revenue, reach US\$ 1850 million by 2023, from US\$ 1730 million in 2017.
