Solar Ingot Wafer is a kind of raw materials used for solar cell. Generally, this material mainly by the high-purity polysilicon feedstock crystal or ingot obtained by pulling ingots, after cutting by the steel wire into very thin (200 microns) round or square of the film which is called silicon wafer.

The increasing capacity and production of solar cells drive the rapid development of Solar Ingot Wafer industry.

As Chinese overall economic downward trend in the past few years, and international economic situation is complicated, in the next few years there will be many uncertainties.
