As a main product in salt industry, strontium carbonate has strong X-ray shielding function and unique physical-chemical properties. It is widely used in electronics, military industry, metallurgy, light industry, medicine and optics fields. It develops fast in world's inorganic chemical materials.

Currently, Solvay is the only major manufacturer of strontium carbonate in Germany and Western Europe, strontium salt upstream products mainly rely on imports from China, which is reflected in China's cheap labor costs and environmental issues, with the development of technology in the next few years, more rational the emergence of technology, there will be more foreign manufacturers will enter into this field.

At present, the downstream market in China is relatively saturated, therefore, subject to major downstream manufacturers greatly troubled by export problems, which forced the domestic manufacturers continue to increase the amount of production technology, higher quality for strontium carbonate.

Over all, although many factors that limit the development of the market, but because of the excellent quality of strontium carbonate, the coming years will greatly promote the development of the food additives industry. Therefore, we recommend that if you have a fixed downstream customer, still highly recommended to enter into this field.

Over the next five years, LPI(LP Information) projects that Strontium Carbonate will register a 2.5% CAGR in terms of revenue, reach US\$ 240 million by 2023, from US\$

200 million in 2017.
