A trampoline is a device consisting of a piece of taut, strong fabric stretched over a steel frame using many coiled springs.

Trampoline industry has low technology barrier and is labor intensive industry.

Currently, there are several producing companies in the world trampoline industry. The main players are JumpSport, Skywalker, Pure Fun, Vuly, Domijump and Stamina.

In consumption market, North America, Europe and Asia-Pacific are the mainly consumption regions due to the bigger demand of downstream applications. In 2016, these two regions occupied 86.63% of the global consumption volume in total.

Trampoline has three types, which include mini trampoline, medium trampoline and large trampoline. And each type has different application people and places relatively. With entertainment and fitness effect of trampoline, the downstream application industries will need more trampoline products. So, trampoline has a huge market potential in the future.

The major raw materials for trampoline are steel pipe and PVC materials, and other auxiliary chemicals. Fluctuations in the price of the upstream product will impact on the production cost of trampoline. The production cost of trampoline is also an important factor which could impact the price of trampoline.

We tend to believe this industry is a rising industry, and the consumption increasing degree will show a smooth growth curve. And the price presents decreasing trend according to the economy development status and international competition. Also, there is fluctuation in gross margin.
