A water bottle is a container that is used to hold water, liquids or other beverages for consumption. The use of a water bottle allows an individual to transport beverage from one place to another. A water bottle is usually made of plastic, glass, or metal. Water bottles are available in different shapes, colors and sizes.

The extremely diversified market for reusable water bottles, encompassing numerous product varieties in terms of material, size, shape, and designs, features presence of a large number of water bottle manufacturers vying for a share in the United States market through the introduction of innovative products. The trends of increased usage of BPA-free materials and rising adoption of smart bottles are expected to have a profound influence on the overall development of the market in the next few years. Over the next five years, LPI(LP Information) projects that Water Bottles will register a 3.7% CAGR in terms of revenue, reach US\$ 2630 million by 2023, from US\$ 2110 million in 2017.
