A water meter is a device that is used to measure the volume of water used by residential and commercial building that are supplied with water by a public water supply system. They can also be used at a well, water source or water system to determine the flow of water via a specific portion of the system. Some water meters measure water in gallons while others measure in cubic feet.

Global water meter industry is dispersed. China occupied a dominant position for water meter, accounting for about 45.85% in 2015, followed by EU, with the production market share of 25.32%.

Leading players in water meter industry are Sensus, Ningbo Water Meter, Itron, etc. Sensus is the largest manufacturer of water meter, with the sales market share of 8.00% in 2015.

The price of water meter is higher year by year from 18.46 USD/Unit in 2011 to 19.00 USD/unit in 2015. In the next few years, we predict that price will continue to increase. As competition intensifies, prices gap between different brands will go narrowing. Residential Use is the biggest application segment of the water meter market, in terms of value, with the market share of 53.16% in 2015.

Over the next five years, LPI(LP Information) projects that Water Meter will register a 7.8% CAGR in terms of revenue, reach US\$ 5180 million by 2023, from US\$ 3300 million in 2017.
